## Unlocking Student-Lecturer Interaction for a Lively Learning Environment

Lecturer's View

- Voting System

- Ask questions anonymously

- Reduce lecture disruption

- Download summary of lecture

- Improve communications between lecturers and students

LiveLe is a web application designed for both students and lecturers. It allow students to give feedback and ask questions as the lecture progress without interrupting the lecturer. Current solutions are not meeting this as they are often geared towards the lecturer allowing them to take attendance or track students activities.

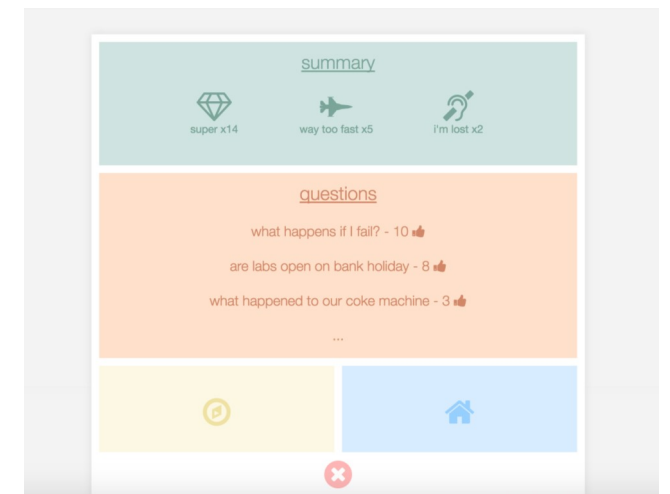

Upload slides for the course (for the lecturer) or simply click into your registered course during lecture to start

Ask questions anonymously

Student's View

Voting System so lecturer can see if the students understand the materials or if they might be going too fast

Download summary of the lecture so the lecturer can determine what the students are struggling with
